|------------------------------|--------------------------------------|--|--|
| Office Action Summary | Application No. 10/696,470 | Applicant(s) POOLE, DAVID L. | |
| | Examiner Alissa L. Hoey | Art Unit 3765 | |

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3, 10 and 16-31 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3, 10 and 16-31 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Applicant's election with traverse of claims 1-3 and 10 in the reply filed on 02/22/05 is acknowledged. The traversal is on the ground(s) that both identified species were previously examined in the first office action. This is not found persuasive because claim 1 was amended to require that the openings/slits are formed through the body of the sock which is different than the openings being formed by a channel, or formed along the body of the sock as originally claimed.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 16, 17, 18, 21-23, 25, 26, 27, 29 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Knox et al. (US 5,814,003).

In regard to claim 1, Knox et al. teaches a sock (10) comprising a body (14, 30), the sock further comprising first and second openings (18, 20) portioned through the body (14) of the sock. The openings (18, 20) are sized to be capable of allowing a second sock to be threaded through the openings and retained to the sock.

In regard to claim 2, Knox teaches the openings being spaced apart parallel slits (18, 20).

In regard to claim 3, Knox teaches the material (12) behind the openings (18, 20) such that a wearer's leg is not viewable through the openings while the sock is being worn (figure 2).

In regard to claims 16 and 17, Knox teaches the body (14, 30) including a leg portion (14) and the openings/slits (18, 20) extending through the leg portion of the body of the sock.

In regard to claim 18, Knox teaches the openings (18, 20) having finished slits that are adapted not to unravel (column 5, lines 1-17).

In regard to claim 21, Knox teaches the body formed from fabric and the openings are formed in the fabric (column 4, lines 28-39).

In regard to claim 22, Knox teaches the sock body (14) defining an internal surface and an external surface and further wherein the sock further includes a swatch (12) attached to the internal surface of the body (figure 2).

In regard to claim 23, Knox teaches the swatch is a fabric swatch (column 4, lines 36-39).

In regard to claim 25, Knox teaches the swatch (12) is knit to the body (column 4, lines 22-27).

In regard to claim 26, Knox teaches the swatch (12) including a perimeter and further wherein the swatch is attached to the body of the sock along a portion of the perimeter of the swatch (column 22-27).

In regard to claim 27, Knox teaches the swatch (12) defining with the body (14) of the sock a channel (16) through which the second sock may be inserted.

In regard to claim 29, Knox teaches the sock body (14) defining an internal surface and an external surface and further wherein the sock further includes a swatch (12) attached to the internal surface of the body (figure 2).

In regard to claim 31, Knox teaches the swatch is knit to the body.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10, 19, 20, 24, 28 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knox et al.

Knox teaches a sock with openings as described above in claims 1, 2, 18, 22 and 29. However, Knox fails to teach the parallel slits are spaced apart a distance that is proportional to the weight of a material from which the second sock is formed. The slits/openings perimeters are segred, seemed, bound and sealed. The swatch being sewn to the body and attached to the body along the entire perimeter of the swatch.

In regard to claim 10, at the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to have provided the parallel slits spaced apart a distance that is proportional to the weight of the material from which the second sock is formed because Applicant has not disclosed that the parallel slits spaced apart a distance that is proportional to the weight of the material from which the second sock is formed provides an advantage, is used for a particular

purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the parallel slits spaced apart a distance that is proportional to the weight of the material from which the second sock is formed or the parallel slits can be spaced apart a certain distance based on aesthetic sensibility and as supported in applicant's specification on page 7, lines 12-17. Therefore, it would have been an obvious matter of design choice to obtain the invention as specified in claim 10.

In regard to claim 19, at the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to have provided the perimeter of the slits being serged, seemed, bound or sealed because Applicant has not disclosed that the perimeter of the slits being serged, seemed, bound or sealed provides an advantage, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the slit being serged, seemed, bound or sealed as long as it is finished in any manner to prevent unraveling and as stated in Applicant's specification on page 8, lines 1-3. Therefore, it would have been an obvious matter of design choice to modify Knox to obtain the invention as specified in claim 19.

In regard to claim 20, Knox teaches the body (14, 30) including a leg portion (14) and further wherein the slits (18, 20) extend through the leg portion of the body of the sock.

In regard to claim 24 and 30, at the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to have

Art Unit: 3765

provided the swatch sewn to the body of the sock because Applicant has not disclosed that the swatch being sewn to the body of the sock provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the swatch being sewn to the body or knit with the body because as long as the swatch is attached to the sock the method in which it is attached is not critical and as supported in Applicant's specification on page 8, lines 4-13. Therefore, it would have been an obvious matter of design choice to modify Knox to obtain the invention as specified in claims 24 and 30.

In regard to claim 28, at the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to have provided the swatch attached to the body of the sock along the entire perimeter of the swatch because Applicant has not disclosed that the swatch attached to the body of the sock along the entire perimeter of the swatch provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the swatch being attached along its entire perimeter or along only the upper and lower ends because as long as the swatch is attached to the body of the sock the amount of seams is not critical and as stated in Applicant's specification on page 8, lines 4-13. Therefore, it would have been an obvious matter of design choice to modify Knox to obtain the invention as specified in claim 28.

Response to Arguments

6. Applicant's arguments with respect to claims 1-3, 10 and 16-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

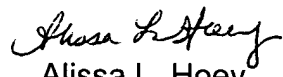

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alissa L. Hoey whose telephone number is (571) 272-4985. The examiner can normally be reached on M-F (8:00-5:30) Second Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert can be reached on (571) 272-4983. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
